

IDHub vs. Other IAM Solutions

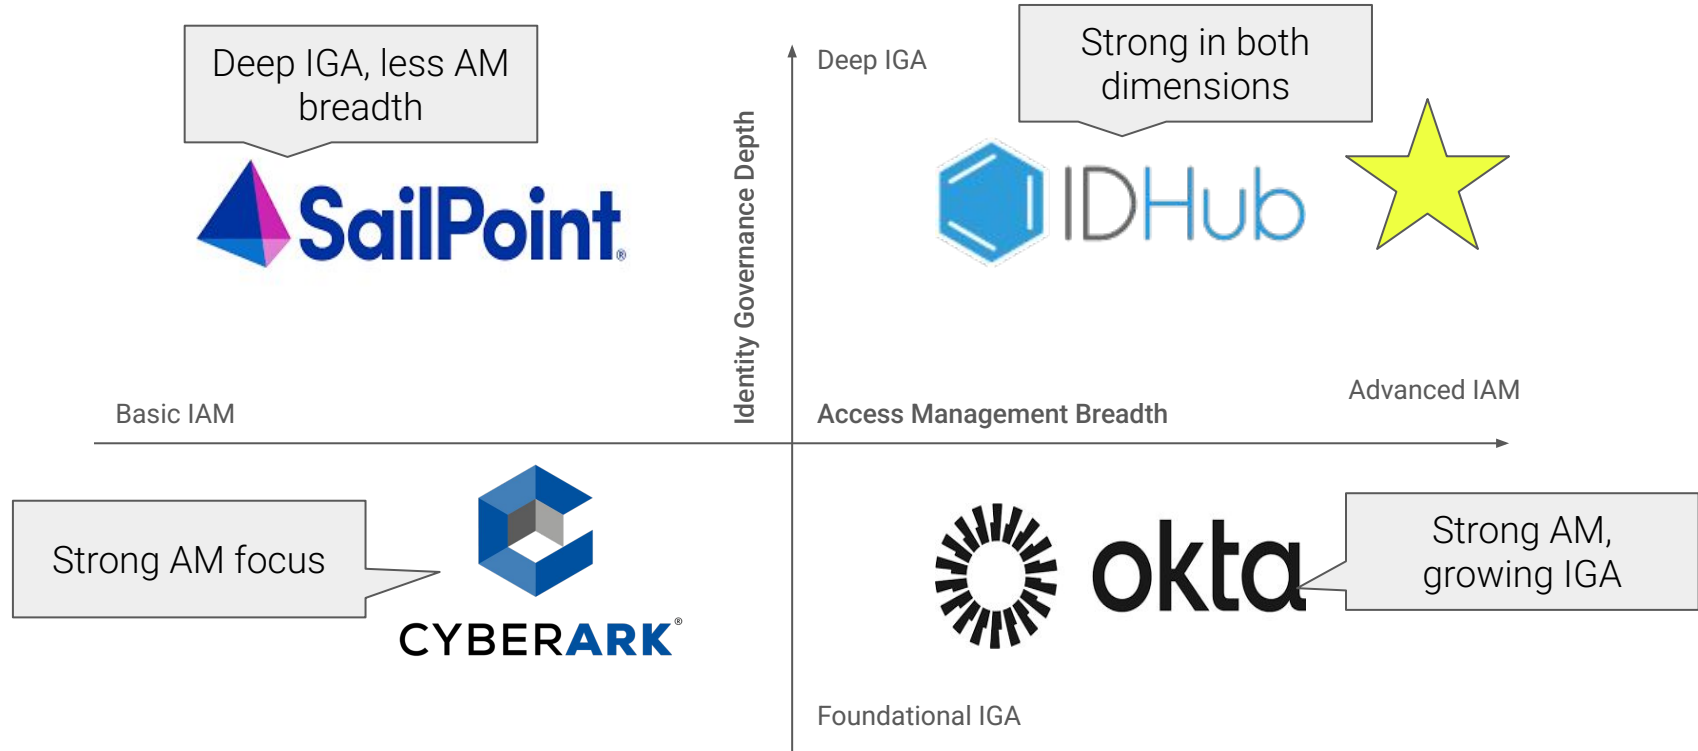

Direct Comparison Across Access
Management, Compliance, and
Flexibility

Where IDHub Leads the Way

Feature	IDHub	Traditional IAM Tools	General Security Products
Unified Access Management	✓ Full user lifecycle + access governance	⚠ Often fragmented	✗ Not focused on access management
Flexible Deployment (Cloud & Self-Hosted)	✓ Same codebase for SaaS or self-hosted	⚠ SaaS-only or feature-limited self-hosted	✗ No IAM deployment options
Customizable Approval Workflows	✓ Visual, no-code builder	⚠ Code-heavy customization	✗ Not applicable
Access Reviews & Compliance Reporting	✓ Built-in, audit-ready	⚠ Manual, limited reporting	✗ Only basic security logs
Seamless Integration	✓ Connects easily with AD, Entra and SaaS apps	⚠ Expensive, custom integration	✗ Limited or unrelated integrations
Role-Based Access Control (RBAC)	✓ Dynamic, automated role management	⚠ Manual, static roles	✗ Typically absent
Cost Efficiency	✓ Transparent pricing, fast ROI	⚠ High implementation costs	✗ Requires multiple tools
User Experience	✓ Modern, intuitive UI	⚠ Outdated, clunky interfaces	✗ Not optimized for user management

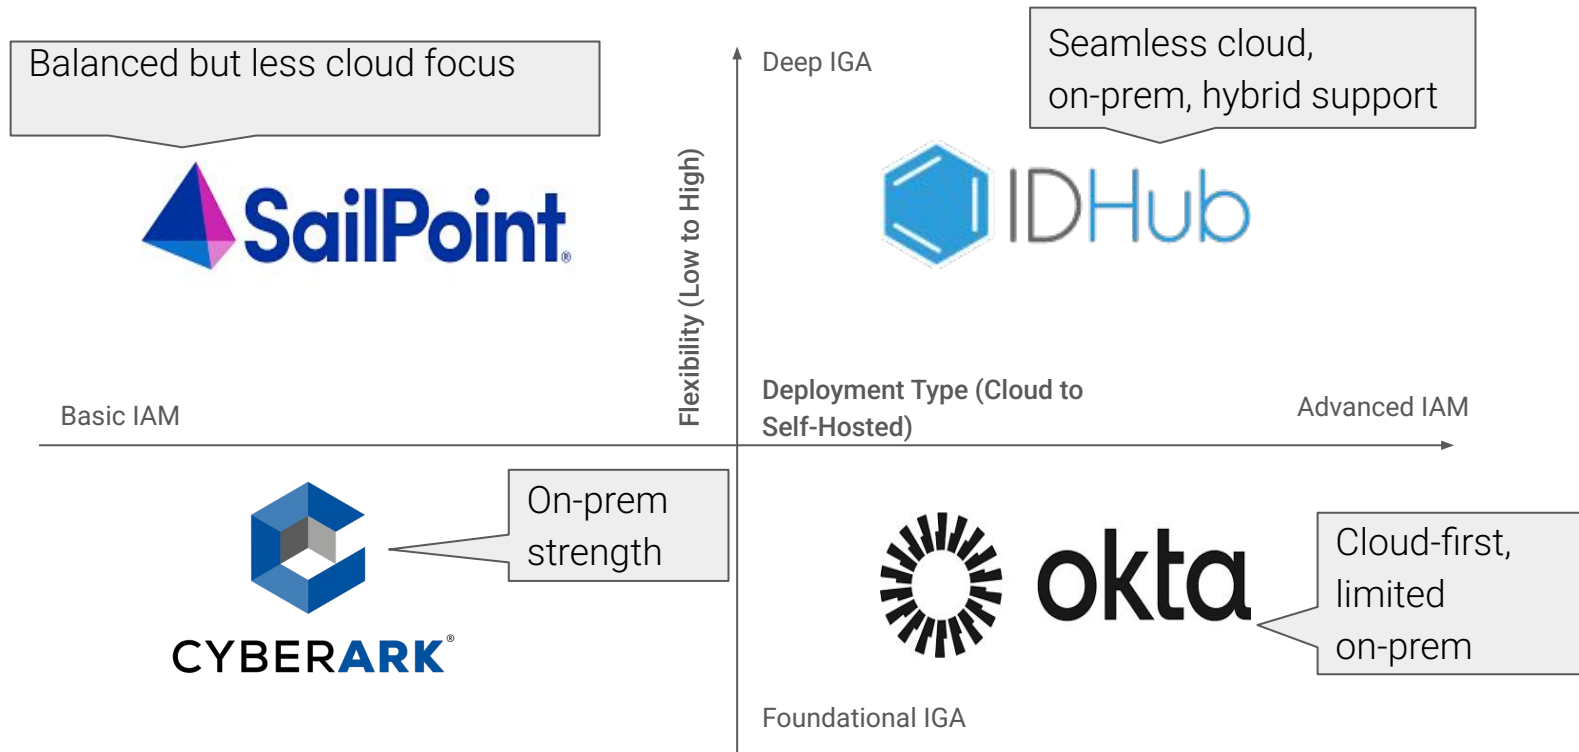

This table compares IDHub with Traditional IAM Tools and General Security Products across key features, highlighting IDHub's strengths such as unified access management, flexible deployment etc. It underscores IDHub's comprehensive and user-friendly approach, setting it apart from fragmented or limited alternatives.

IDHub: Where IGA Meets Access Control

This landscape shows how IDHub uniquely combines deep Identity Governance capabilities, comparable to specialized IGA vendors, with comprehensive Access Management features. Unlike other solutions, IDHub provides a unified platform addressing both critical IAM pillars.

Deployment Flexibility

IDHub offers unparalleled deployment flexibility supporting cloud, self-hosted and hybrid environments, allowing organizations to choose the best fit for their needs.

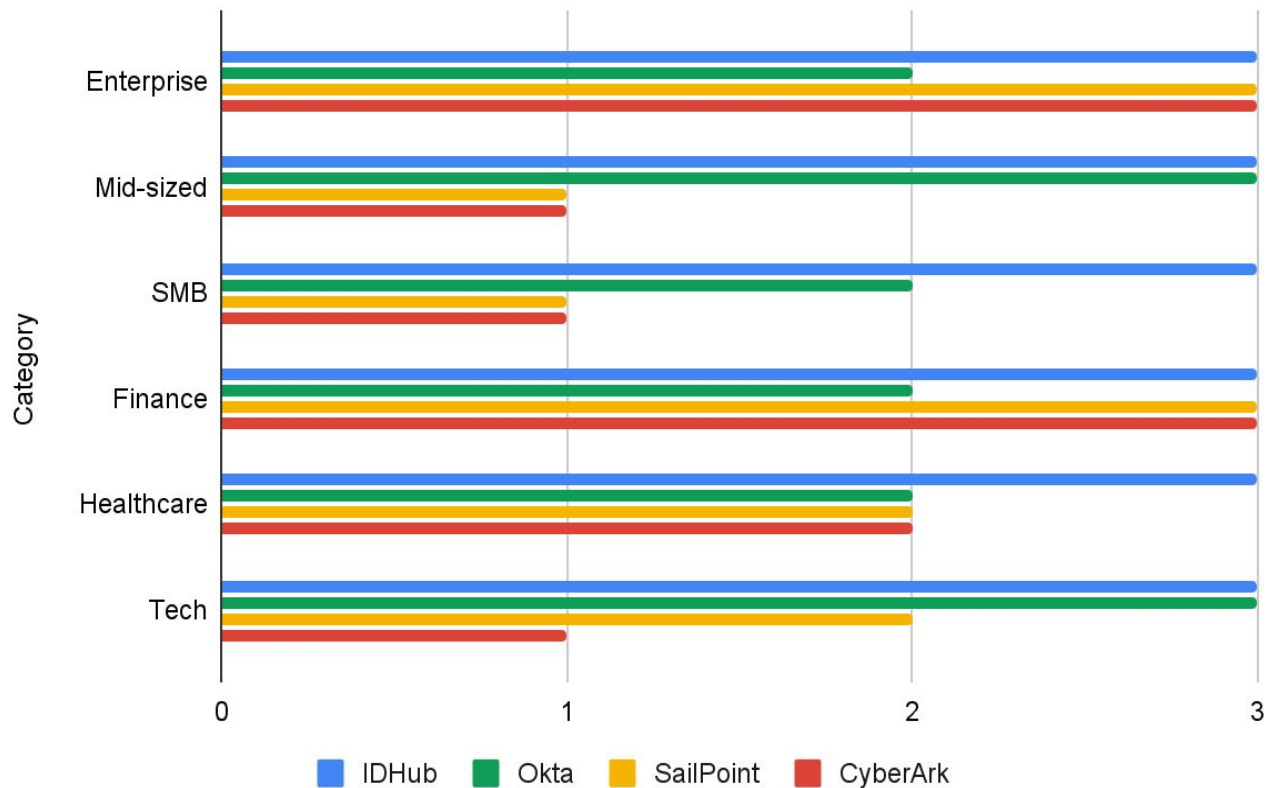

Unified Platform: IDHub vs. Specialized Solutions

Feature	IDHub	Okta	SailPoint	CyberArk
Identity Governance				
Access Management				
Privileged Access				
Deployment Flexibility				

IDHub offers a balanced and comprehensive feature set across core IAM disciplines within a single platform, contrasting with competitors who often specialize or require multiple products. IDHub's deployment flexibility caters to diverse infrastructure scenarios needs from mid-market to enterprise.

Tailored for Every Organization: IDHub's Versatility

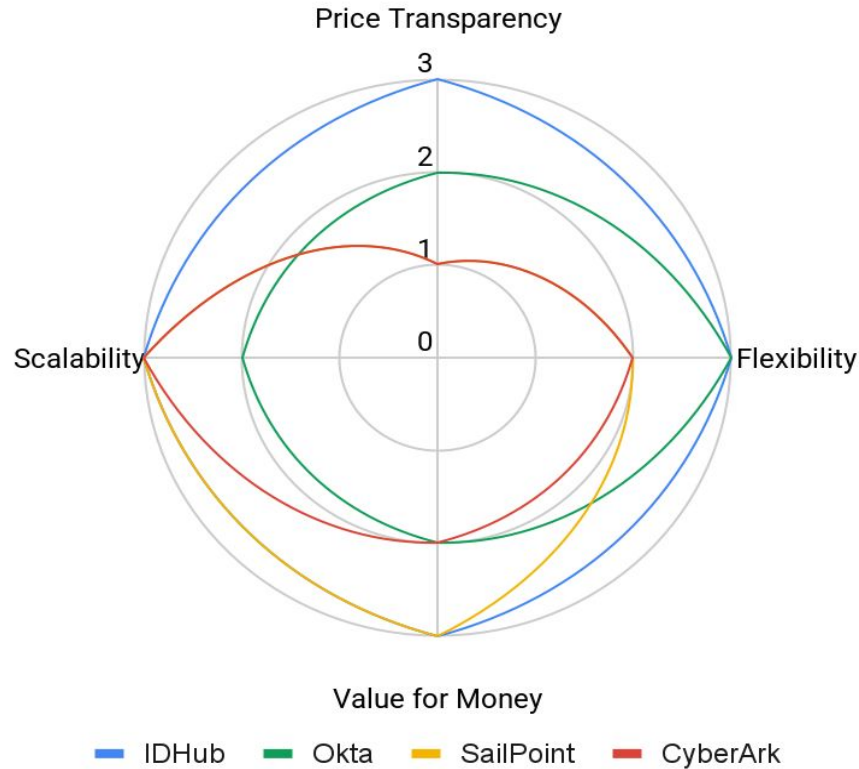

- **IDHub:**
Universal fit for all
- **Okta:**
Mid-sized, tech focus
- **SailPoint:**
Enterprise, finance strength
- **CyberArk:**
PAM for finance, enterprise

IDHub is designed to meet the IAM needs of organizations of all sizes and across various industries, with customizable solutions. (Scale: 1=Low, 2=Medium, 3=High)

Optimal Value: The IDHub Pricing Advantage

- **IDHub:**
Transparent, flexible pricing
- **Okta:**
Flexible but less transparent
- **SailPoint:**
Enterprise value, opaque pricing
- **CyberArk:**
Scalable for PAM, costly

IDHub delivers exceptional value with transparent pricing models that cater to different budget sizes, ensuring organizations get the most bang for their buck. (Scale: 1=Low, 2=Medium, 3=High)

Why Organizations Choose IDHub

Single Codebase Flexibility

Cloud and on-prem deployment

Compliance-First Design

Easily meet SOX, GLBA, PCI-DSS, HIPAA, and GDPR

Lightweight, Powerful, and Affordable

No expensive modules, faster time to value
